

10-YEAR WARRANTY & CARE INSTRUCTIONS

Your shower screen comes with EnduroShield surface protection. Register your warranty at www.enduroshield.com/en/warranty-registration/

Conditions: EnduroShield must be maintained as per the manufacturer's instructions to validate and maintain the warranty. PCT Global Pty Ltd warrants that the EnduroShield protection will remain water repellent (water bead angle remaining greater than 70 degrees) on clean glass for 10 years from the date of purchase. *This warranty is solely for the EnduroShield treatment, not the glass or any other components.*

EnduroShield makes cleaning much easier and less frequent; however, it is recommended that you continue to clean the surfaces regularly.

Maintaining the Treated Surface

For best results, drying the glass with a soft rubber squeegee after each use will keep the glass clean and reduce mineral spots forming. The glass needs to be cleaned weekly using a damp microfiber cloth and a mild detergent to break down soaps, oils, and conditioners on the glass.

Hard Water Maintenance

In hard water areas or areas where water drops dry and leave a noticeable dust mark, a build-up of minerals may occur on the protective treatment. While these may not be removed easily with detergent, mild acids will often remove the marks quickly. White vinegar should be used to clean the glass. Keep in mind the vinegar may be diluted with water. However, dilution reduces the effectiveness. Spray vinegar onto the glass and allow to soak for several minutes. This will dissolve any mineral deposits that have built upon the surface. A damp microfiber cloth should then be used to wipe over the surface. For extremely hard water areas, we recommended using the vinegar solution every week or so as a cleaning option to reduce build-up, rather than allowing the build-up to continue over a long period.

Caution: Prohibited Products **Note these may damage the treatment and void any warranty.*

- Avoid the use of any harsh or chemical cleaners, with correct maintenance these are never required
- Avoid the use of any abrasives or polishes including water spot removers, toothpaste, polishes, rough, or gritty substances
- Avoid the use of acids or alkalis that you would not want in contact with your skin for an extended period
